

1 **Name of Study: Contraception Induced Menstrual Changes**

2 **Study component: Focus Group Discussion, Females**

3 **FGD ID#: CIMC 102**

4 **Date of FGD: 27 November 2024**

5 **Time FGD Began: 10h44**

6 **Time FGD Ended: 12h31**

7 **Name of Facilitator: [redacted]**

8 **Name of Note taker 1: [redacted]**

9 **Name of Note taker 2: [redacted]**

10 **Location of FGD: Wits MRU board room**

11 **Name of Transcriber: [redacted]**

12 **Name of Translator: [redacted]**

13 **Name (s) of Reviewer (s): [redacted]**

14 **Observers: [redacted]**

15

16 ***CONTEXTUAL INFORMATION***

- 17
 - *This was an FGD with women between the ages 18-49 years.*
 - *The interview was conducted in a private interview room.*
 - *Participants were relaxed, laughing, responsive and willing to share their perceptions and experiences. The participants were exhausted, uncomfortable, less responsive and shy when discussing the last section that spoke about sex.*
 - *There were 7 females.*

23

24 ***VERBATIM TRANSCRIPT***

25 **F: I greet you again in our discussion for today. Today's date is the 27th of November 2024. The**
26 **time is 10:44. Focus number C102. Okay, so, before we start our discussion, I would like for us to**
27 **do an activity that will make us a bit creative, be open, uhm get to know each other better without**
28 **using our names. Isn't we remember that when continuing with our discussion we will use**
29 **numbers [for identification of participants].**

30 **P2: Mhm [Participants agreeing]**

31 **F: But I would like for us to get to know each other better. So, the activity that we will do is as**
32 **follows; which animal do you see yourself as, and why do you choose this animal?**

33 **[Chuckles by participants]**

34 **F: I can start, so that you [interviewer meant that she would start so that participants become**
35 **relaxed], yeah. So, I see myself as a tiger. We know a tiger, right?**

36 **Mhm [Participants agreeing]**

37 **F: Mhm [agreeing], so, a tiger, what I like about it is that first, it is different. It has stripes, which**
38 **makes it different, so, I like that, that I am unique. Another thing that I like about the tiger is that**
39 **it hunts. A tiger, even when the others [referring to other animals] are sleeping, it doesn't sleep,**

40 **it is hunting. And it doesn't go with the crowd, a tiger most of the time is alone. So, I am a person**
41 **who likes being alone and I like being eager. When I want something, I go after it, you see. I can**
42 **also say I am a hunter; you see. I am a person that when they want something in life, I make sure**
43 **that I do my best to get it, so, yeah.**

44 [Participants raised their hands]

45 **F: Speaker number 4. We will come back to you, speaker number 7.**

46 P4: Hello.

47 Yes. [Participants responding to the participant]

48 P4: I like being a hen.

49 **F: Mhm [Neutral]**

50 P4: I like hustling for my kids. And I can open my wings for my kids, I always protect them. I like that
51 it can look after its kids even if a hawk comes, it [hen] closes, it closes so that there is no hawk to abuse
52 its [hen] children. I am like that; I don't like my children to get abused.

53 [Participant raised her hand]

54

55 **F: Mhm [Neutral], okay, thank you. Number 7.**

56 P7: I like being a rabbit because the rabbit has tricks, and it is clever. Any animal that comes after it, it
57 quickly becomes alert and protects itself.

58 [Chuckles by participants]

59 P7: So, it has tricks.

60 [Chuckles by participants]

61 [Participant raised her hand]

62

63 **F: Okay, thank you. Number 1.**

64 P1: Hello.

65

66 Yes [Participants responding to the participant]

67

68 P1: I relate to a cat. A cat most of the time observes and looks at how things are going. A cat is clean,
69 and it likes itself.

70

71 **F: Mhm [Neutral], thank you//**

72

73 P3: //[Chuckles] She said mine [participant is referring to the animal that was mentioned by participant
74 number 1]//

75

76 **F: //[Chuckles] That is also fine, number 3.**

77

78 P3: I am also a cat.

79

80 **F: Mhm [Neutral].**

81

82 P3: I am clean, I love myself and I observe. When you do something to me, I will do you wrong.

83
84 [Chuckles by participants]
85
86 P3: I will do you wrong shame; a cat does you wrong. It doesn't forget. If you have done something to
87 it, it doesn't forget shame. I am like that.
88
89 **F: Mhm [Neutral].**
90
91 P3: If you do me wrong, I will be revengeful and painful. I will come back with a snake!
92
93 [Chuckles by participants]
94
95 P3: Something that will make you go *hla!* [It is a sound in isiZulu describing your body shaking, being
96 scared and shocked].
97
98 [Participant raising her hand]
99
100 **F: Thank you so much, number 2.**
101
102 P2: Oh, my goodness! [Slight silence by participant] I am also a cat!
103
104 [Chuckles by participants]
105
106 P2: [Chuckles] I am also a cat! I will fight back. I am like that.
107
108 **F: Mhm [Neutral].**
109
110 P2: I first look at you and say, "Oh I will show this one". [Chuckles] I am like that. But I love myself
111 shame. Yeah [Chuckles].
112
113 [Participant raising her hand]
114
115 **F: Okay, thank you. Number 5.**
116
117 P5: I can say that I am a crocodile.
118
119 **F: Mhm [Neutral].**
120
121 P5: I am a down-to-earth person. I keep quiet, I wait for you to start with me and then//
122
123 P2: [Chuckles]// then you strike!
124
125 P5: [Chuckles] I am like that.
126
127 [Participant raising her hand]
128
129 **F: Okay, thank you. Number 6!**
130
131 P6: Hello.
132
133 P2: Yes.
134
135 P6: I like being a rabbit. The reason I like being a rabbit is how smart it is. And it is full of tricks. It
136 can outsmart a person who is competing with it.

137
138 **F: Mhm [Neutral].**
139
140 P6: So, I can say that I always say I am like a rabbit.
141
142 **F: Thank you so much. I think we were all able to share.**
143
144 Yes [All participants responded at once]
145
146 **F: We now know each other better. Just to remind you, when we are going to start talking, we**
147 **say our numbers [Meaning: participants' identification number] and then talk. We must also**
148 **raise our voices when talking but I am happy to get to know you today. To continue with our**
149 **discussion, today our discussion will be talking about menstrual cycles. So, sometimes people use**
150 **different words when talking about menstrual cycle. Which words do you use when talking about**
151 **menstrual cycle?**
152
153 [Participant raising her hand]
154
155 **F: Number 1.**
156
157 P1: The one I am used to is **ukuba sezinsukwini zakho** [Meaning: a direct translation is, "it is to be on
158 your days". In this context the participant means to be on your menstrual cycle days].
159
160 [Participant raising her hand]
161
162 **F: It is to go on your days, [participant raising her hand] number 2.**
163
164 P2: **Irobhothi livalile** [a direct translation is, "the robot is closed". The robot refers to the traffic lights].
165 [Chuckles]
166
167 **F: What does it mean that the robot [referring to the traffic light]//**
168
169 P2: //It is [menstrual] periods//
170
171 **F: //It is periods//**
172
173 P2: //Yes, it [traffic light] is red.
174
175 **F: [Chuckles] Oh, the robot [traffic light] is red.**
176
177 P2: Yes, it is red.
178
179 **F: Oh okay. Okay, please may I come back to number 1. You mentioned that it is to be on your**
180 **days.**
181
182 P1: Mhm. [participant agreeing]
183
184 **F: What does that mean, when you say it is to be on your days?**
185
186 P1: It is to be at a state where you are not supposed to be galivanting, respect yourself when you are on
187 your [menstrual] periods. Don't go around visiting.
188
189 **F: Okay, thank you. [Participant raising her hand] Speaker number 5.**
190

191 P5: I usually say **ngiseJapan** [the direct translation is, “I am in Japan”].

192

193 **F: Japan?**

194

195 P5: Yes, because the flag from Japan is white and then it has a red dot. So, I describe it as a pad//

196

197 **F: //Oh, a pad, a pad is white.//**

198

199 P5: //Yes, a pad is white but when you are on your [menstrual] periods you then have red [menstrual
200 blood]//

201

202 **F: //Red//**

203

204 P5: //Which means I am on my [menstrual] periods.

205

206 [Participant raising her hand]

207

208 **F: Okay, number 4.**

209

210 P4: I usually say **ngikushintshi** [this directly translates as, “it is to be on change”]. Which means that
211 from time to time I must go and check if I don’t have to go and change a [menstrual] pad.

212

213 [Chuckles by participants]

214

215 **F: [Chuckles] Okay, thank you.**

216

217 P7: I usually say **ngisendaweni yami** [this directly translates as, “I am at my place”], because when I
218 am at my place, I must respect myself and the things that I do I have to pay attention to. So, I say, I am
219 at my place.

220

221 **F: Okay. Is there anyone else that would like to share?**

222

223 P3: I say **ngiseyinsukwini zami** [this directly translates as, “I am at my days”], [which means I am on
224 my period], this is where I don’t want to be touched, I don’t want anything. I am focusing on myself
225 only.

226

227 **F: Mhm [Neutral].**

228

229 P3: Yes.

230

231 **F: Okay, thank you so much. So, the words that we came up with now or the ones that we were
232 sharing, we can use them when continuing with our discussion because they are words that we
233 use, that we understand//**

234

235 P2: //Yes//

236

237 **F: //So, for us to be comfortable, we can use them when continuing with our discussion. How do
238 people usually track when they are about to go on their menstrual periods? How do they track
239 that the [menstrual] periods are about to start?**

240

241 P3: I fart.

242

243 [Chuckles by participants]

244

245 P3: That's how I track that I am about to go on my days [Meaning: in this context "to go on my days"
246 means when the participant is about to have their menstrual periods].

247

248 **F: Okay//**

249

250 P2: // I have menstrual cramps//

251

252 **F: //You have menstrual cramps before//**

253

254 P2: //Yes, before the [menstrual] periods. I have them first before I go on [to menstrual periods].

255

256 **F: Mhm [Neutral], okay.**

257

258 P6: I have blisters on my vagina. A small painful pimple. So, when it shows that time, I know that in
259 the next 2 or 3 days I will be on [menstrual] periods.

260

261 **F: Okay...//**

262

263 P7: //I become moody//

264

265 **F: //Mhm [Neutral]//**

266

267 P7: // The day before I go on [menstrual] periods. I become emotional. I cry, I cry for nothing then I
268 can tell that it will get messed up [participant means that she will start her menstrual periods] tomorrow
269 or the day after. I just cry.

270

271 **F: Okay...**

272

273 P5: I just think of food, food is what I think of. I have cravings even when I am watching tv. The things
274 that I watch, I think of food. Chicken meat smells ugly for me, then raw one. Then I can see that I am
275 about to go on [menstrual] periods.

276

277 **F: Mhm [Neutral], okay...**

278

279 P4: I see with, nothing happens on my body but on my underwear, I just have that brownish thing
280 [discharge] that comes out. That's how I see.

281

282 **F: Mhm [Neutral], before you start to go on your menstrual periods?**

283

284 P4: Yes, yes.

285

286 **F: Oh okay.**

287

288 P1: My breasts become painful and hard. Then I crave something with sugar, like cake.

289

290 **F: Mhm [Neutral], okay. Thank you so much for sharing your experiences. Maybe is there
291 anything else different that you have heard from other people, the way they track if they are going
292 to go on their menstrual periods? [Slight silence by participants] Apart from your experiences,
293 what have you heard from other people that you would like to share?**

294

295 [Participant raising her hand]

296

297 **F: Yes, number 6.**

298

299 P6: My friend, when she is going to go on her [menstrual] periods, her face has lots of pimples. It
300 becomes swollen and painful//

301

302 **F: //Mhm [Neutral]//**

303

304 P6: // Then she knows that the following day she will be on her [menstrual] periods.

305

306 **F: Okay//**

307

308 P2: To attest with number 6, it is that.

309

310 **F: Number 2.**

311

312 P2: I, number 2, to second number 6, I know that you have pimples. You have pimples.

313

314 **F: That means you are about to go on//**

315

316 P2: //You are about to go on//

317

318 **F: [Menstrual] Periods//**

319

320 P2: //Yes.

321

322 **F: Okay. Is there something else? [Slight silence by participants] Okay, thank you so much for**
323 **sharing. To have the same understanding with regards to menstrual cycle since we will be talking**
324 **about menstrual cycle throughout our discussion, uhm when we are talking about menstrual cycle**
325 **we are talking about the monthly cycles. Another thing that we need to note is that it includes the**
326 **time just before you bleed, and the time just after bleeding, and other times of the month in**
327 **between. So, when we are talking about menstrual, we are including all of that when we are**
328 **continuing with our discussion. Are we still good though?**

329

330 Yes [All participants responded at the same time]

331

332 **F: Okay. Now, I would like for you to think about how your menstrual cycles have changed while**
333 **using contraceptive, it can be changes that were good or changes that were not good. So, to talk**
334 **about those changes, there are questions that I will ask you that will make us talk about the**
335 **changes that took place between us//**

336

337 P2: Yes.

338

339 **F: The first one, please tell me about any ways contraception has changed how often you have**
340 **bleeding. [Participants raising her hand] Number 4.**

341

342 P4: In a month maybe, I go twice on my [menstrual] periods. I go [on menstrual periods] when it
343 [month] starts maybe on 2, 3, 4, 5, 6 [participant referring to the dates in the month when she is on her
344 menstrual periods]. Then on the 25th, towards the end of the month I go back again, and it is not a lot of
345 days. Maybe it is for 2 to 3 days//

346

347 **F: //Mhm [Neutral]//**

348

349 P4: //Yes.

350

351 **F: Okay...**

352

353 P2: Uhm [Neutral], mine has also changed. It happens that I don't go on it [participant referring to
354 menstrual periods], it happens that I go on it [participant referring to menstrual periods]//

355
356 **F: //Oh okay...//**

357
358 P2: //It happens that several months end without going on it [participant referring to menstrual periods].
359

360 **F: Mhm [Neutral]. Okay, number 6.**

361
362 P6: I can say that it was...I can say that...the change that occurred was drastic because when I started,
363 I went on [menstrual] periods for over 6 months, I started inserting the implant//

364
365 **F: //Mhm [Neutral]//**

366
367 P6: //And during those 6 months it is not like I am going [on menstrual periods] today and stopping
368 tomorrow. No, it is every day for 6 months. Then after those 6 months, maybe 1 month will pass and
369 then the following months I will stay for 3 or 4 months without going on [menstrual] periods at all. It
370 is like fluctuation, if I go [on menstrual periods] for 6 months, the following months will stay for 4
371 months without going [on menstrual periods]. Sometimes I go for 3 months [on menstrual periods] and
372 sometimes I don't go [on menstrual periods]//

373
374 **F: //Mmh [Neutral]//**

375
376 P6: And another thing happens, that if I go [on menstrual periods] for 6 months, maybe 6 months ends
377 on periods, the following month I know that I should be discontinuing [menstrual periods] by that time//

378
379 **F: //Mhm [Neutral]//**

380
381 P6: Then I must go to the clinic, and they give me [participant means she is given pills at the clinic],
382 there are those pills that are sometimes given to you if you want to discontinue [a contraception method]
383 or want to go on [menstrual] periods. I drink those pills. So, yeah//

384
385 **F: //So, all these changes occurred when you started to use an implant?**

386
387 P6: Yes.

388
389 **F: Okay, please can we come to number 7 and then we will come to number 5.**

390
391 P7: Using the injection changed my [menstrual] periods because I used to go [on menstrual periods]
392 normal. Maybe go [on menstrual periods] for 5 days. But when I used the injection, I would go [on
393 menstrual periods] for 2 weeks. And even then, it wasn't like it was normal periods that came out
394 [participant referring to the menstrual blood], no I spot, maybe I spot for 2 weeks. I know I must wear
395 a pad for 2 weeks. It is not something big, it is just spots [of menstrual blood]. On another month it
396 happens that I don't go at all [on menstrual periods]. On another month I go on normal [menstrual]
397 periods, like 5 days. It changes//

398
399 **F: //Mhm [Neutral]//**

400
401 P7: //I sometimes spot for 2 weeks and sometimes I don't go on [menstrual] periods and sometimes I
402 go [on menstrual periods] for normal days, 5 days.

403
404 **F: Okay, okay, number 5.**

405

406 P5: My periods changed when I started to go on contraception. In a month I would go [on menstrual
407 periods] for 3 weeks and rest on the last week. And they would be heavy, even clots would come out//
408

409 **F: //Mhm [Neutral]//**
410

411 P5: I would sometimes have a headache. When I go to the clinic, they say it is something that happens
412 to have irregular [menstrual cycles] and all of that. But I would worry that *ay* [no] no they do become
413 irregular but mine seems like it is worse.
414

415 **F: Mmh [Neutral]**
416

417 P5: I told myself that maybe I shouldn't prevent because when I was not preventing, I would go on
418 [menstrual periods] maybe 3 times a month. In 1 month, I would go on [menstrual periods] 3 times. So,
419 it hasn't changed but they said I must continue with the contraception. It was a contraception injection
420 that is for 2 months. They said I must continue with the contraception because I am still young and all
421 of that.
422

423 **F: Mhm [Neutral], okay... Number 1.**
424

425 P1: There was a lot of change because I now go [on menstrual periods] for a lot of days, before I used
426 to go 3 days. Now I even go [on menstrual periods] for 5 or 6 days. So, pads, I must buy 2 pads [referring
427 to packets] in a month yet I was using 1 [sanitary pad pack]. And it has happened that I bleed so much
428 that I told myself that I am having a miscarriage, yet it is a lot [participant referring to how often she
429 has bleeding].
430

431 **F: Okay, thank you so much for your experiences that you have shared currently. I would like
432 for us to look at if you are on your menstrual period, do you bleed a lot or do you bleed less
433 because of the methods that you use for contraception?**
434

435 [Participant raising her hand]
436

437 P2: I use an implant. I don't want to lie, it is not the same, it is not the same how often I go on my
438 [menstrual] periods. The blood is not the same, it happens that I go [on menstrual periods] a lot//
439

440 **F: //Mhm [Neutral]//**
441

442 P2: //I go on [menstrual periods] the whole month//
443

444 **F: //Mhm [Neutral]//**
445

446 P2: //It happens that I only spot.
447

448 **F: Oh okay...**
449

450 P2: Yeah, that is how it is.
451

452 P3: Mine is like number 2. When I go [on menstrual periods] it becomes heavy, and sometimes it is
453 spotting and maybe 2 weeks even so. 2 weeks I keep on spotting and spotting.
454

455 **F: Okay...**
456

457 P6: To support number 2 and number 3. I also go on heavy [menstrual] periods. In such a way that I
458 decided that whenever I am on my [menstrual] periods not to use pads because I was using [sanitary]
459 pads, and then can you imagine using a [sanitary] pad for the next 6 months? So, you have a rash around

460 the vagina, so I stopped [using] the [sanitary] pad and used tampons. Tampons still treated me badly
461 [participant means having side effects due to using sanitary pads]. So, I ended up using - I am a child
462 raised by granny guys, there is usually a T-shirt that doesn't work that is old. And then you take that T-
463 shirt and cut it and use it because since I am bleeding heavily, I couldn't anymore, I was getting hurt
464 because when I have a [sanitary] pad on it was becoming painful because you can imagine every day it
465 is [menstrual] blood, every day. Heavy periods! Heavy periods! I then decided to change from [sanitary]
466 pads and use clots.

467
468 **F: I hear you, [participant raised her hand] number 7.**

469
470 P7: Mhm [Neutral] please may I second number 3. I also mix, it happens that I spot for 2 weeks yet the
471 time I had not started the injection I was going [on menstrual periods] well, [menstrual periods were]
472 normal. I would start with heavy [menstrual bleeding] and continue nicely for 5 days. But when I was
473 using the injection, I now spot for 2 weeks.

474
475 **F: [Participant raising her hand] Number 4!**

476
477 P4: It becomes heavy, the [menstrual] blood looks like it is maroon, it is not red. It becomes blood that
478 you don't understand, it even smells badly since I have inserted a loop.

479
480 **F: Oh okay...//**

481
482 P5: //Since I have started to be on contraception, my blood is heavy. Yet before I was on contraception
483 it [menstrual blood] would be heavy and end up spotting.

484
485 **F: Okay. Okay, no, thank you so much. We will move on to the next question but please don't**
486 **mind that I will ask you questions that will sound like you have answered. Some of you have**
487 **answered some of the questions but I will go through them for everyone to have the opportunity**
488 **to answer them.**

489
490 P4: Okay.

491
492 **F: So, please tell me how contraception has changed how regularly you bleed? [Slight silence by**
493 **participants] Maybe it is bleeding that comes when you least expect it, or it is bleeding that comes**
494 **when you expect it? [Participant raising her hand] Yes, number 4.**

495
496 P4: It [bleeding] comes when I don't expect it. Sometimes I know that at the beginning of the month,
497 maybe on the 1st or on the 30th or 29th, I know that on the 1st I am starting [to bleed]. Then on the 7th I
498 will be towards finishing. Now, it [bleeding] comes at any time, on the 2nd, on the 8th or on the 7th, there
499 is no date that is exact. The periods recycle, they change from time to time but this time it [menstrual
500 periods] changes drastically because on the 7th, 8th, 6th, 1st, you, see? It is skipping, I don't know which
501 one [date] is it exactly. I must always have [sanitary] pads every day! That I know that I have in my
502 bag, because it might happen that I am sitting, and it [menstrual blood] is coming out.

503
504 **F: Okay, so, you find it hard to know when bleeding will start.**

505
506 P4: Yes.

507
508 **F: [Participant raising her hand] Number 5.**

509
510 P5: To also second number 4, my time to go on [menstrual] periods is not the same. It is not the same.
511 I don't have that , "oh on this day I will go on [menstrual] periods. I don't know when to visit the guy
512 [referring to her male partner]//

514 [Chuckles by participants]
515
516 P5: //Because I don't know if I visit him I will//
517
518 P2: //You will go on [menstrual periods]//
519
520 P5: //Go on [menstrual periods], so, it [menstrual changes] made my things bad.//
521
522 [Chuckles by participants]
523
524 **F: [Chuckles] Okay, thank you. [Participant raising her hand] Number 2.**
525
526 P2: I am seconding number 4 and number 5.
527
528 **F: Mhm [Neutral].**
529
530 P2: That there is no date anymore, that maybe on a certain date I must wait [for menstrual periods].
531 Anytime now **ziyakhala** [Meaning: it is a Zulu slang word that in this context means that the participant
532 starts their menstrual period when she least expects it].
533
534 **F: [Chuckles] When you say ziyakhala, what do you mean?**
535
536 P2: It means that I anticipate that anytime I will go on [menstrual] periods. There is no time where I
537 say, "I will go on my periods now, soon". I must wait for anytime [to go on menstrual periods].
538
539 **F: Oh okay...//**
540
541 P4: //Yes.
542
543 **F: Okay, is there anyone else that would like to share? [Slight silence by participants] How has**
544 **been on contraception changed how long you have bleeding? So, for example, when you bleed**
545 **how many days does it take? I know that some of us had mentioned, but please can we go over**
546 **this question, if you are bleeding how many days does it take since you are using contraception?**
547 **[Participant raising her hand] Number 3.**
548
549 P3: As I had mentioned, 2 weeks and I spot. Maybe it discontinues on the 3rd week. And then again on
550 the 4th one I will see it [menstrual period] heavy. You see, there is no rest exactly.
551
552 **F: Mhm [Neutral], so, you would say before you used a contraception method your days [of being**
553 **on menstrual period] were less?**
554
555 P3: I knew that I go [on menstrual periods] for 7 days. I knew before that I am 7 days [participant means
556 she would go on her menstrual periods for 7 days]. So, it is not like that anymore. Now it is 2 weeks, it
557 discontinues on the 3rd week and then on the 4th one it comes back. So, if I must make myself happy, I
558 must make myself happy in the one [week], because I know that after that **ziyakhala** [it is a Zulu word
559 that in this context means that the participant will have to face again the problem of having menstrual
560 periods again] , it is coming back again.
561
562 [Chuckles by participants]
563
564 P3: Think about that, but I won't take it out [referring to the contraception] even if it is like that.
565
566 **F: When you say when you make yourself happy, how do you make yourself happy?**
567

568 P3: The husband [referring to the male partner], you can imagine I have to make sure//
569
570 [Chuckles by participants]
571
572 P3: //I must make sure that ay here I also give him a chance because I know I will go back [participant
573 means she has sex with her male partner when she is not on her periods for 1 week because she knows
574 that she will go back and continue to have menstrual periods after that specific 1 week].
575
576 **F: Oh okay//**
577
578 P3: //Yeah, it is something like that//
579
580 **F: When you “make sure”, I am asking so that the note taker understands what you were saying//**
581
582 P3: //We have sex everyday dear//
583
584 P2: //Oh, my goodness!//
585
586 [Chuckles by participants]
587
588 P3: Not many rounds [referring to the number of times they have sex when they are engaging in sexual
589 intercourse], we have small rounds. We have sex almost every day in that week. It [week] becomes
590 busy!
591
592 [Chuckles by participants]
593
594 **F: Okay, thank you so much. [Participant raising her hand] Number 7.**
595
596 P7: I can say that my bleeding after having used the 2 months injection, it has changed because I know
597 bleed 2 weeks. I also spot. Yet before I used the injection, I was bleeding normally. Maybe I would
598 bleed for 5 to 6 days, it would start by being heavy, heavier, and then it will be right and spot. After the
599 injection I spot 2 weeks full.
600
601 **F: Mhm [Neutral].**
602
603 P3: Mmh.
604
605 **F: Okay, [participant raising her hand] number 1.**
606
607 P1: I must tell myself that the whole week I am on my [menstrual] periods. Because I bleed a lot.
608
609 **F: Mhm [Neutral].**
610
611 P1: Mhm [participant agreeing].
612
613 **F: Before you used contraception, how was it?**
614
615 P1: It was normal, I would go for 3 days, something normal, you see. I would finish quickly.
616
617 **F: Okay.**
618
619 P2: Before I was on contraception I would go on [menstrual periods] 7 days. I would go on [menstrual
620 periods] for 7 days. Okay, but now! oh my goodness! I also don’t know. I don’t know this thing. I would

621 even go to the clinic and say, “ay no I am taking it out [referring to the contraception]” and I would turn
622 there [at the clinic and go back home].

623

624 [Chuckles by participants]

625

626 P2: If I continue to take it [contraception] out, I will fall pregnant [chuckles]. Ay, I would stay [with
627 the contraception] and be patient until I am alright. You see when I have a rash, when I have a rash
628 because of the pad, but yeah, I am I am getting used to it because I do take a break [from menstrual
629 periods] and on other months not go on [menstrual periods].

630

631 **F: Okay...Is there anyone that wants to share?**

632

633 P4: No, it is the same.

634

635 **F: Okay. So, when bleeding, how have the contraception methods changed how much you bleed**
636 **during those days? So, for example, do you bleed a lot? I know that some have mentioned//**

637

638 P2: //Mhm [Neutral]//

639

640 **F: //Do you bleed heavy or light, is it hard or easy? [Participant raising her hand] Number 5.**

641

642 P5: Since I am contraceptive, I bleed a lot. I even come out blood clots. And [sanitary] pads, they
643 become short. But my aunt helps me because she works at a school. There are those [sanitary] pads that
644 are received by children [at school]. She sometimes brings them [sanitary pads] for me. So, that helps
645 me, that there is someone who covers me with [sanitary] pads. Money doesn't get wasted in that way.

646

647 **F: Okay, thank you. Is there anyone else that would like to share? [Slight silence by participants]**
648 **Okay, how has using contraception methods changed how your bleeding looks during your**
649 **menstrual cycle? [Participant raising her hand] Number 4.**

650

651 P4: Red blood comes out but when I am in my periods, a maroon one comes out. I don't know where
652 the maroon one comes from. Maroon, black! Something that you don't understand. I don't know what
653 to say, it is that for me.

654

655 [Participant raising her hand]

656

657 **F: Okay, number 6.**

658

659 P6: To support number 4, I also have the same problem. Because, you see, maybe I will go [on
660 menstrual periods] on the 1st day. Sometimes I also don't understand it, is it black or is it maroon or
661 dark maroon but it will happen for 2 days. Then after 2 days of the black or maroon it starts to become
662 [red] – but it [menstrual cycle] doesn't have one color until I finish. Sometimes it is red, sometimes it
663 is somehow black, sometimes it becomes maroon.

664

665 **F: Mhm [Neutral], okay. [Participant raising her hand] Number 7.**

666

667 P7: Before I started using an injection, it was blood that was red. But when using the injection, I
668 mentioned that I spot. It is just something light, light red//

669

670 **F: //Light red//**

671

672 P7: //Yes, light red.

673

674 **F: Okay, is there anyone else that would like to share? [Slight silence by participants] Okay, is**
675 **there maybe a change, maybe you find you have small blood clots during your menstruation? Is**
676 **there a change like that you experienced? [Participant raising her hand] Number 2.**

677

678 P2: Yes, it happens when I haven't gone on my menstrual cycle for a long time. Like now, it has been
679 a long time. Maybe if I were to go [on to my menstrual cycle], blood clots will come out. It happens.

680

681 **F: Mmh, okay, it happens when//**

682

683 P2: // It has been a while; it is not like before. Isn't before I started to go on a contraception, I would go
684 [on menstrual periods] month after month. Now there are months that I don't go [on menstrual periods].
685 I think it is caused by that, that the other months I don't go on [menstrual periods].

686

687 **F: Okay, okay.**

688

689 P1: It happens when on the days when I am going to start my periods, for 2 days I come out clots.

690

691 **F: Mhm [Neutral]. Oh, clots come out.**

692

693 P1: Yes, clots come out.

694

695 **F: How long does it take?**

696

697 P1: It is for 2 to 3 days, it is clots.

698

699 **F: Okay, thank you. [Participant raising her hand] Number 5.**

700

701 P5: I want to agree with number 1. I always come out clots when I am starting [menstrual] periods. The
702 whole 3 weeks that I go on [menstrual periods] they [blood clots] come out. Then I rest on the last week.
703 There it is quiet and then when it [menstrual periods] comes back, they [blood clots] come out again.

704

705 **F: Okay, thank you so much. I am aware that the things we are sharing seem to be deep, you see.**

706

707 P5: Yeah...

708

709 **F: So, thank you for being comfortable and sharing. Thank you for that. Uhm, there is this**
710 **discharge that comes come that is not blood. Uhm, have you seen that discharge that I am talking**
711 **about?**

712

713 C_102_0: It comes out when you are about to finish [participant referring to when you are about to
714 complete your menstrual period] maybe?

715

716 **F: It can be when you are about to finish [menstrual cycle] or before you go on your menstrual**
717 **cycle. Some see it even when they are on their menstrual periods. But it is a discharge. Has anyone**
718 **had something like that? [Participant raising her hand] Yes, number 4.**

719

720 P4: When I am about to start [menstrual periods], I first see with the discharge//

721

722 **F: //Mhm [Neutral]//**

723

724 P4: If I am going to the toilet, when I look at the underwear, because it is when I am not aware that I
725 am about to start periods. I see that thing that is slippery, I don't understand its color. Is it cream
726 [referring to the color of the discharge] or?

727

728 **F: Mhm...Okay, number 6.**

729

730 P6: Just to add to number 4, I also see that, but it happens when I am about to go on them [participant
731 is referring to menstrual periods] because since I have irregular menstruation, so, you don't know when
732 it is going to happen. So, the minute maybe I go to the toilet and see it, I become aware that okay there's
733 a possibility that I might go on [menstrual] periods. So, it [discharge] is something like jelly like. It is
734 something you don't understand what kind of a thing it is.

735

736 **F: Oh okay, what color is it?**

737

738 P6: It differs because it doesn't have a specific that maybe it is white or it is – because it is something
739 like a discharge, you see//

740

741 **F: //Mhm [Neutral]//**

742

743 P6: Even with my discharge I don't know the color of it. I knew it before I was on my contraceptives
744 but after I was on them, I don't know. Because sometimes, it is white and at times it is like brown. At
745 times I don't understand it. Because it happens that since you are a woman, you become aware of all
746 these things, you become curious that, “and then what is this, where is it coming from” you see.

747

748 **F: Okay, thank you so much. Is there anyone else that would like to share? [Slight silence by
749 participants] Okay. So, please tell me about changes that you had with your [menstrual] cramps
750 when using contraception. Are there any changes that you experienced with your [menstrual]
751 cramps?**

752

753 P3: For me, it is the menstrual cramps, I experienced it a lot before [using contraception]//

754

755 **F: //Mhm [Neutral]//**

756

757 P3: //But since I have inserted the implant ay//

758

759 **F://You don't experience them anymore?//**

760

761 P3: Even though it is that slight pain, it is not the same. I can bear it; it doesn't even need a tablet.

762

763 **F: Okay. [Participant raising her hand] Number 5**

764

765 P5: I had menstrual cramps before but now it is back pains. It becomes painful here [participant pointed
766 to the back of her body, above her buttocks].

767

768 **F: Okay, you don't have menstrual cramps anymore?**

769

770 P5: Yes, I don't have menstrual cramps anymore. I just have back pains only.

771

772 **F: But previously you had them [menstrual cramps].**

773

774 P5: Yes, I had them.

775

776 **F: Okay. [Participant raising her hand] Number 2.**

777

778 P2: I have menstrual cramps, but I have them if I am going to go on [menstrual cramps]. It is not like
779 before//

780

781 **F: //Mhm [Neutral]//**

782
783 P2: Because I would go on month to month [participant means she used to go on her menstrual periods
784 every month] but now I have them [menstrual cramps] when I am about to go on [menstrual cramps].
785 Because it happens that I skip months, maybe 3 months, 4 months I don't go on [menstrual periods].
786

787 **F: Mhm [Neutral], previously were they [menstrual cramps] severe?**

788
789 P2: Yes, they were, they were. I would have them month to month, month to month//
790

791 **F: //But only if you are about to start periods//**

792
793 P2: //Yes, when I am about to start periods.
794

795 **F: Okay, is there anyone else that would like to share? [Slight silence by participants] Are we still**
796 **good though?**

797
798 Yes! [All participants responded at once and sounded lively].
799

800 **F: So, when we were busy with our discussion, sharing our experiences, our colleagues, our note**
801 **taker was writing. So, on the wall they placed the things we were discussing. Please can we look**
802 **at them and review the things that they mentioned. While we were talking, maybe there were**
803 **things that we forgot to share. Please may we share if there are things that we forgot. But let us**
804 **look at the things we discussed. The first one, there was a question that said, “how often you**
805 **bleed”. Others mentioned that they bleed for 2 weeks, others said they skip a month, others said**
806 **it is 5 days, others said they bleed every day for 6 months, others said 4 months because of the**
807 **implant. Others said they don't even go on their menstrual periods because of contraception.**
808 **Then the second questions, “how regularly you bleed”. Others said sometimes heavy, others said**
809 **they spot, others said they spot for 2 weeks since the injection, they said it becomes heavy because**
810 **of contraception. And then, “how long you bleed”. Others said 2 weeks, others said 6 months,**
811 **others said they are no longer sure because there are changes that are happening so they can't**
812 **track how long they bleed. Then the next one , “how much you bleed”. Others say they bleed**
813 **heavily. Others said there was a change after using the injection. They spotted for 2 weeks. Others**
814 **said they spot for 2 weeks and then 2 weeks it becomes heavy. So, we can see that there is change**
815 **when an individual is using contraception. And then, “how your blood looks” when you are on**
816 **your menstrual cycle. Others said they have clots during the entire [menstrual] periods. Others**
817 **said their [menstrual] periods look like they are maroon, like black because it is not red the**
818 **normal way. Others said they see fluids before they start going on their menstrual cycle. They**
819 **look like a discharge. Okay, then we looked at “menstrual cramps”. Others said they have**
820 **menstrual cramps before they start [menstrual] periods. Others said they don't have periods, but**
821 **it becomes painful at the back [of their bodies], have back pains. Others have a lot of cramps as**
822 **compared to before, because of using contraception. Is there maybe something that we forgot that**
823 **you would like us to add? [Participant raising her hand] Yes, number 5.**
824

825 P5: There by how long you bleed, 3 weeks//

826
827 **F: //How long you bleed//**

828
829 P5: //Yes, 3 weeks.
830

831 **F: 3 weeks, okay we will add and say, “3 weeks”. [Note taker is writing the additional information]**
832 **[Participant raising her hand] Number 4.**

833
834 P4: I can't see twice a month. I can't see it.
835

836 **F: Twice a month.**

837

838 P4: Yes, that I go twice a month [on menstrual periods] when it is starting and finishing.

839

840 **F: Okay... [Note taker is noting down the additional information]. So, we have 3 weeks and twice**
841 **a month. Okay, thank you so much. We have added it. It is for 3 weeks and twice a month. Is**
842 **there anything else that we would like to add. Maybe changes that we didn't mention while we**
843 **were having a discussion that we had because of using contraception methods. [Participants**
844 **raising their hands] We will start with number 6, 4 and then 7.**

845

846 P6: Guys, please bear with me isiZulu is not my strength//

847

848 **F: //It is okay you can also speak English//**

849

850 P6: //Okay. So, the difference that was there apart from the irregular menstruation, was the weight loss
851 after inserting the implant. Because we notice that the periods are abnormal, not realizing that the more
852 you go on your menstrual cycle for a long, the body loses weight because the blood is coming out a lot
853 compared to your normal cycle. So, I lost weight and secondly, I lost the love of being intimacy
854 [Meaning: participant meant being intimate. She understood being intimate as having sexual
855 intercourse] out of nowhere. When I am doing [sexual intercourse] it, I am just doing [sexual
856 intercourse] it because I must do it. But I could feel it in me deep down that ay [no] no, I don't want to
857 do this. Then I went as far as going to the clinic to go and ask if it is normal that since I am using an
858 implant that I feel like the way I feel. They said it is normal, it will eventually discontinue. I think it is
859 the 3rd time I am inserting the implant//

860

861 **F: //Mhm [Neutral]//**

862

863 P6: //But still it is the same thing. I haven't gotten used to it, I just told myself that I will eventually get
864 used to it. I will do this thing; I will be intimacy [Meaning: participant meant being intimate. She
865 understood being intimate as having sexual intercourse] because I live with my partner. I must be
866 intimacy [Meaning: participant meant being intimate. She understood being intimate as having sexual
867 intercourse]. I can't say I am still on my periods for 6 months, wait for me. He will wait for me for 6
868 months; he won't wait for me for the whole year. So, it was that, I lost interest in intimacy [Meaning:
869 participant meant being intimate. She understood being intimate as having sexual intercourse] and lost
870 weight. And it was hard. You can imagine you are moving from size 38 and going back to 34 and 32
871 because you are on your periods. That's the difference, the shift that was there since I am using an
872 implant.

873

874 **F: Okay, thank you for sharing. Thank you.**

875

876 P4: Others who don't know it might find it funny, yet it is something that exists. In my vagina, I inserted
877 a loop. On my left-hand side in my vagina, I had a cyst, something like a pimple//

878

879 **F: //Mhm [Neutral]//**

880

881 P4: //The biggest one. It appeared, when I went to do a pap smear the nurse said she can't insert metal.
882 She made a [referral] note for me, and I went to [Name of hospital]. [Name of hospital] they conducted
883 an operation for the cyst. The doctors mentioned that it might come back, and it has come back. Right
884 now, I have it, it is on the right [side of the body] now//

885

886 **F: //The cyst//**

887

888 P4: //The cyst. So, one day when I was listening to [Name of radio station], there was doctor that was
889 talking about women and men issues, and I popped a question. He said my hormones are closed by

890 something in me. Which means that when I inserted the loop, it closed my hormones. The time the one
891 this side showed, it got cut and then this one showed this side. If it were to be cut again, it would appear
892 again on this side. So, it is like a game. I am taking it out, it appears, I am taking it out, it appears. The
893 thing that I think I must end up doing is to take out the loop because it keeps on affecting me. Because
894 even when I am having sex, it comes out//

895

896 **F: //The loop comes out?//**

897

898 P4: //The bump that I mentioned, the cyst. It comes out, even when you insert your finger in your vagina
899 there is a lump that comes out on the side. It is not painful. It becomes painful if I am on my periods. It
900 doesn't become painful like having pains but there is a thing like a rash that looks like pimples on it,
901 like if I continue using a [sanitary] pad during those days when menstruating. But the problem I have
902 had since I inserted a loop is the cyst only. Which means I need to end up taking out the loop because
903 the hormones will end up not being right.

904

905 **F: Mmh [Neutral], okay.**

906

907 P7: When I started the injection, when I just started it early last year//

908

909 **F: //Mhm [Neutral]//**

910

911 P7: //It made me gain weight. It made me have big cheeks. I had a big stomach. I gained weight and
912 saw that I am gaining weight. Then in November I discontinued it//

913

914 **F: //Mhm [Neutral]//**

915

916 P7://After discontinuing it I got skinny, I got skinny. When I got skinny, I went back to the injection.
917 The body is starting to get back to shape.

918

919 **F: Okay, thank you so much for sharing your experiences. Whilst talking about the changes that
920 happened because of using contraception methods, are there changes that you can say occurred
921 with regards to how your body feels because of using contraception methods? [Participant raising
922 her hand] Yes.**

923

924 P3: It affected me using contraception methods. I really loved sex but now it feels like someone is
925 raping me [when being sexually active].

926

927 [Chuckles by participants]

928

929 P3: It feels like I am being raped, I loved it [sexual intercourse]. Now, *ay* [no] no. There is something
930 wrong, I can see that *ay* [no]. There are tablets that they [at the clinic] said they will give me them; they
931 will restore [the appetite for sexual intercourse]. They restored [the appetite for sexual intercourse] but
932 now they made me behave wrong, they made me act wrong, they made me love it [sexual intercourse]
933 a lot. I don't know what their [tablets] name is, they [tablets] were in another box that were like black.
934 They made me behave wrong, that's the problem but they made me yearn for it [sexual intercourse].
935 Ay now, I even take cheese and try to boost [referring to boosting her sexual drive], banana [the
936 participant even eats banana to boost her sex drive].

937

938 [Chuckles by participant]

939

940 P3: To try and have this thing come back [participant referring to her sex drive].

941

942 **F: So, you can say it affected your emotions?**

943

944 P3: Emotions, yeah.
945
946 [Participant raising her hand]
947
948 **F: Okay, number 5.**
949
950 P5: To agree with number 3, I loved sex. I loved it a lot. When I started contraception, even my partner,
951 I saw him as annoying. If he wants [sex], you see, it just becomes a coincidence, and I have [menstrual]
952 periods. Then I would say to myself maybe I should not do it [sex] anymore. I feel sad. I would say,
953 “okay let’s try”. But I would say to myself he is annoying.
954
955 [Chuckles by participant]
956
957 P5: He was annoying, he was annoying, because it would be a coincidence, he wanted it [to have sex]
958 at the wrong time.
959
960 **F: Mhm [Neutral], okay number 6.**
961
962 P6: Ei, I am alright for now.
963
964 **F: Okay. Uhm, all these changes that we have spoken about of menstrual cycles. How did they**
965 **impact your day-to-day life? Others have shared that their sex life has changed a bit, in their**
966 **relationship they get affected. Maybe is there anywhere where you were affected in terms of at**
967 **work, at home...[Slight silence] anything.**
968
969 [Participant raising her hand]
970
971 **F: Number 5.**
972 P5: For me, it is at home. At home, I don’t know. I become lazy when I am on my periods. I don’t act
973 like before when I woke up, cleaned and did chores that are done by girls.
974
975 **F: Mhm [Neutral].**
976
977 P5: I just become lazy. They said that maybe did I have fallen pregnant again. I become lazy like a
978 person who is pregnant.
979
980 **F: Okay...**
981
982 P5: I don’t become active in-house chores.
983
984 **F: Okay, is there anyone else that would like to share?**
985
986 P3: It is becoming moody. When I am on my [menstrual] periods, I become moody.
987
988 **F: Mhm [Neutral].**
989
990 P3: Ay, I become moody.
991
992 **F: Okay...**
993
994 P3: Yeah, I just become moody.
995
996 **F: Number 2**
997

998 P2: I start [menstrual periods] anytime. I went to [name of city], I was on set [participant is referring to
999 the workplace in the entertainment industry]. You know that on [name of film], I got a feature and
1000 dressed up [name of actress].

1001
1002 **F: Mhm [Neutral].**
1003

1004 P2: I started [menstrual] periods that I don't know of [meaning the participant started her menstrual
1005 periods unexpectedly]. The problem is that I am not even used to tampons. They use tampons there
1006 because they wear G-strings [it is underwear that consists of a narrow strip of cloth attached to a
1007 waistband that covers only the genital area]

1008
1009 **F: Mmh [Neutral].**
1010

1011 P2: It is that.

1012
1013 **F: So, you can also say that it [contraception] affects you even at work.**
1014

1015 P2: Yeah.

1016
1017 **F: Okay. Uhm, please can we go back to number 3. You mentioned being moody. So, how does
1018 that change of becoming moody because of using a contraception method?**
1019

1020 P2: It ends up not being nice in the house. You see, being moody and having anger. Even if a person
1021 tries to play with me, I just get annoyed by little things and see that I am getting annoyed. He [male
1022 partner] even says that whenever I start my menstrual periods, I always have anger and am moody, I
1023 don't want someone to even touch me. Yet, I don't do anything I just say, *ay* [Meaning: A Zulu
1024 expression which in this context is an expression of being irritated]! *ay* [Meaning: A Zulu expression
1025 which in this context is an expression of being irritated]! *ay* [Meaning: A Zulu expression which in this
1026 context is an expression of being irritated]! I just get annoyed.
1027 [Participant raising her hand]

1028
1029 **F: Okay, number 1.**
1030

1031 P1: The change that was there is that you can't go to church while on your [menstrual] periods. So, you
1032 are forced to stay at home and don't go to church, because as a person who worships at [Name of
1033 church], they can't pray for you because it is like you are dirty//

1034
1035 P2: //Dirty.
1036

1037 **F: How does that make you feel?**
1038

1039 P1: It saddens me because when I go to church, I know that it is where I get to be happy. So, when I
1040 don't go, it doesn't sit well with me.

1041
1042 **F: Okay... Is there anyone else that would like to share? [Slight silence by participants as a way
1043 of communicating that there is nothing that they would like to add] Okay, thank you so much. I
1044 would like for us this time to look at the things that we were talking about. Uhm, our note taker
1045 has noted some of the things that we were talking about with regards to the questions that I was
1046 asking you. Before we read through it, is there anything else that you wish for us to talk about
1047 that we didn't add or talk about it? [Slight silence by participants as a way of communicating that
1048 there is nothing they would like to add] Okay, we looked at, "how changes make your body feel".
1049 Others said there is weight loss. Others said there is a cyst because of using a loop. Others said
1050 there is a loss of interest in terms of intimacy [Meaning: participant meant being intimate. She
1051 understood being intimate as having sexual intercourse]. Is there anything that we can add?**

CIMC 101 English 24 Dec 2024

Final Version 1.0

Page 20 of 41

1052 [Slight silence by participants as way of communicating that there is nothing that they would like
1053 to add] Okay. Then there is “how changes impact your daily life”. Another one said they become
1054 moody. Another one said they become lazy, so, at home she ends up not doing anything because
1055 she becomes lazy. Another one said they become irritable. Another one said it affects her even at
1056 work because her [menstrual] periods start when she least expects. Another one said it affects her
1057 in terms of going to church, she said she can’t go to church if she has started her menstrual
1058 periods. Is there something else that maybe we can add? [Slight silence by participants as a way
1059 of communicating that there is nothing that they would like to add] Thank you so much for
1060 sharing your experiences. Are you still good?

1061
1062 We are good [All participants responded together at once and lively]

1063
1064 **F: You can drink water and relax. We are about to start another activity, since we are continuing**
1065 **with our discussion. Okay, is there anyone who wants to drink water, are we all alright?**

1066
1067 We are alright [All participants responded together at once]

1068
1069 **F: Okay. So, now we are going to do body mapping. Okay, the reason we call it body mapping is**
1070 **because on the wall, when we turn and look, we will see there is a body [chart]. On my left, there**
1071 **is a front of the body of a woman. And on my right, there is a back of a woman. Okay, so, in this**
1072 **activity what we will be doing or the purpose of doing this activity is to be able to talk about things**
1073 **that we face concerning menstrual cramps, while using contraception. Okay, so, what is going to**
1074 **happen is that we will you individually stickers, they are different and have different colors. And**
1075 **then you will paste it anywhere there, whether it is at the front or at the back where you feel**
1076 **cramps because of contraception. So, while we were talking in our discussion, we mentioned that**
1077 **there are different things that we use for contraception, right?**

1078
1079 Yes! [participants agreeing]

1080
1081 **F: So, please can we start with people who are using pills, please can they take yellow stickers and**
1082 **place them anywhere on the body where they feel menstrual cramps. Those that are using pills,**
1083 **please raise your hands and go in front to place the stickers. [Participants sitting down] Is there**
1084 **anyone using stickers?**

1085
1086 P1: Yes.

1087
1088 **F: Number 1.**

1089
1090 [Participant number 1 standing up to go and place her sticker]

1091
1092 **F: You place it anywhere. [Sounds of movements] Wherever you feel menstrual cramps on your**
1093 **body. [Participant number 1 has placed her sticker] Okay, thank you. Are there any of you that**
1094 **use the injection? [Participants raising their hands] Okay, please can the ones using the injection,**
1095 **number 7 and number 5 place stickers where you feel menstrual cramps on your bodies.**
1096 **[Participants number 7 and 5 stood up and placed their stickers.] Are there any of you using**
1097 **implants? [Participants raised their hands] Number 3 and number 2, please can we take stickers**
1098 **there that are blue. [Participants number 3 and 2 stood up and placed their stickers]. Okay, is**
1099 **there anyone who uses an IUD? [Slight silence by participants] Okay, is there anyone who uses**
1100 **any other method that we didn’t mention?**

1101
1102 P4: For the loop, I don’t have anything [participant means she doesn’t have any menstrual cramps when
1103 using the loop] [Participant is speaking softly and sounds uncertain].

1104
1105 **F: Number 4.**

1106
1107 P4: I don't have [menstrual] cramps, I don't have anything.
1108
1109 **F: Oh okay. Okay, so, [participant raising her hand] number 6.**
1110
1111 P6: I also don't have any cramps.
1112
1113 **F: Oh okay. So, you use an implant, but you don't have menstrual cramps.**
1114
1115 P6: Yes.
1116
1117 **F: Okay. Thank you. So, there [referring to the body mapping charts, there are our stickers.**
1118 **Please may we take gold stickers, the stars that are gold, right.**
1119
1120 Mhm [participants response is neutral]
1121
1122 **F: We will place them on the body where we feel as though that is the place on the body where we**
1123 **experience a lot of pain. That is where the menstrual cramps are troublesome on our bodies.**
1124 **Please can we stick them. [Participants standing up and sticking the gold stars]. Okay, you are**
1125 **allowed to use 2 stars if you need to. [Silence, movements of participants sticking the gold stars].**
1126 **Okay, right, is there anyone else that we have left out who wants to place a sticker there? Are we**
1127 **all done?**
1128
1129 **[Participant raising her hand]**
1130
1131 **F: Number 6.**
1132
1133 P6: The place that is painful since I have inserted the implant, I think it is where I have inserted the
1134 implant. Because at times when you are sleeping, you get tired, you feel like placing your head on the
1135 hand [participant meant she feels like placing her head on her arm when sleeping]. So, it is like it
1136 [implant] is moving. You see, maybe if I am folding my hand [participant meant her arm] like this,
1137 sleeping like this. It is like it [implant] is moving. That means, it [implant] is opening another place [on
1138 the arm] because it [implant] is moving, it is not on one place. So, if you are going to change your
1139 position, maybe for sleeping, it is like it gets pushed upwards//
1140
1141 **F: //Mhm [Neutral]//**
1142
1143 P6: //So, when that motion happens it becomes painful where it [implant] is inserted.
1144
1145 **F: Where is that?**
1146
1147 P6: On the left.
1148
1149 **F: On the left of the arm?**
1150
1151 P6: Yes, of the arm.
1152
1153 **F: Oh okay. [Slight silence] Okay, I can see on the front and back of the body that we have placed**
1154 **our stickers. How would we explain - let's start with the front, where we have placed our stickers,**
1155 **that area where we have placed our stickers, what do we call that place?**
1156
1157 P3 : It is **isinya [bladder]** or what.
1158
1159 **F: **Isinya [bladder].****

1160 P3: Mhm [participant agreeing]
1161
1162 **F: Oh okay. And then at the back, that part where we have placed the stickers, what do we call**
1163 **it. Number 1.**
1164
1165 P1: It is *iqolo* [the back].
1166
1167 **F: *iqolo* [the back].**
1168
1169 P1: Mhm [participant agreeing].
1170
1171 **F: Okay, thank you. Number 6 mentioned that there is a pain that she feels on her arm because**
1172 **of the implant, please go and place a sticker there. [Participant number 6 stood up and placed the**
1173 **sticker on the body part]. Okay, thank you. So, we mentioned that it is *iqolo* [the back], we**
1174 **mentioned *isinya* [bladder], are there other words used for these body parts that we have**
1175 **mentioned? [Slight silence by participants] No, there isn't?//**
1176
1177 P1: No.
1178
1179 **F: Okay. Please can the one who placed a sticker on the front, anyone who placed a sticker there**
1180 **share their experience about menstrual cramps that they have. [Participant raised their hand]**
1181 **Number 2.**
1182
1183 P2: Yes. It becomes painful, I get strained. It becomes like that; it is painful, and it is unbearable. And
1184 it is painful, it is painful, it is painful.
1185
1186 **F: When you say you get strained//**
1187
1188 P2: //I wrap myself//
1189
1190 **F: //When you say you get strained, you get strained in the bladder?//**
1191
1192 P2: //There [on the bladder], yes.
1193
1194 **F: Oh okay...**
1195
1196 P2: I wrap myself; it is painful.
1197
1198 **F: Okay, what helps you when you feel that pain?**
1199
1200 P2: I take tablets for pains.
1201
1202 **F: Okay, okay. [Participant raising her hand] Mhm [interviewer agreeing to allow the participant**
1203 **to speak].**
1204
1205 P7: I feel pain, like I am getting poked. It is like there are needles. What I usually do I drink water and
1206 sleep on my stomach.
1207
1208 **F: Okay, you drink hot water?**
1209
1210 P7: Yes, warm [water] and then I wrap my stomach.
1211

1212 **F: Okay, is there anyone else that would like to share? [Slight silence by participants] Okay, we**
1213 **have 3 stickers there. They are stars. Why have you placed the stickers that are stars, where you**
1214 **have placed them. Why did you say it is the part that is most troublesome?**

1215
1216 P1: It is the part that is most troublesome when I am on my menstrual periods. It is painful.
1217

1218 [Participant raising her hand]

1219
1220 **F: Mhm, okay. Yes number 5.**

1221
1222 P5: I placed it [star] at the back because it is the most painful body part, and I can't sit up straight. When
1223 I sit up straight, it becomes like I don't know, it becomes like I am getting hurt. It is like I can always
1224 sit bending like this, it becomes better if I am bending.
1225

1226 **F: Okay, thank you so much for sharing your experiences. Maybe can we share what else do we**
1227 **do to avoid menstrual cramps that we have. [Participant raising her hand]. Yes number 1.**

1228
1229 P1: I take a bottle and put hot water in it and place it where it is painful. Then it is like it [muscle] is
1230 disintegrating. The pains become better.
1231

1232 **F: Okay, mhm [Neutral], is there anyone else that would like to share? [Participant raising her**
1233 **hand] Number 5.**

1234
1235 P5: I don't do much, I don't take any medication. I sit and bend. I listen to the pain telling me what to
1236 do so that I can be alright.
1237

1238 **F: Is there anything that you have tried, and it has helped you or?**

1239
1240 P5: Mhm [no] tablets for pain, I have tried them, and they didn't help me. So, I just stopped [taking the
1241 tablets for pains]. It becomes better if I am going to listen to it [participant referring to the pain] until it
1242 stops.
1243

1244 **F: Okay. Alright, okay, thank you so much. Can you share that when you were using**
1245 **contraception methods, they felt less pain, less [menstrual] cramps? [Slight silence by**
1246 **participants] Is there anyone that can say, "when I was using a contraception method, I had less**
1247 **pains than before". [Participant raising her hand] Number 3.**

1248
1249 P3: Since I have used contraception methods, as I have mentioned that my menstrual cramps became
1250 less [painful], even though it becomes painful in the bladder, but it is not the same as before. I would
1251 even vomit if I am on my [menstrual] periods before I used anything. It became better when something
1252 came out and I vomited, then it would be better. Even the tablet didn't help. But now when there is this
1253 [participant is referring to the contraception] I can use the tablet for pains and the pain becomes better.
1254

1255 **F: Okay.**

1256
1257 P3: Mhm [participant's response is neutral].
1258

1259 **F: Thank you so much. Are we still good?**

1260
1261 Yes! [All participants responded together at once]
1262

1263 **F: Okay. So, thank you so much for sharing your experiences, we will now move on to our next**
1264 **questions. What information did you get from the clinic or from the healthcare providers about**

1265 **changes to your menstrual cycle before you started using the contraception method? [Participant**
1266 **raising her hand] Number 5.**

1267

1268 P5: The nurses told me that since I am going to start contraception, I will have different [menstrual]
1269 periods than before. There will be changes in the body. But I never have any changes on my body
1270 because I don't have pimples. It is just that the [menstrual] blood comes out with blood clots every time
1271 when going on menstrual periods.

1272

1273 **F: Okay, would you say that information helped you or it didn't help you?**

1274

1275 P5: It helped me because I got to be aware because I would always be afraid that maybe – I don't know
1276 – I would always be afraid, it helped me.

1277

1278 **F: Okay, is there someone else who would like to share? [Slight silence by participants] Thank**
1279 **you so much. Now, let's think about all the things we have talked about today. What do you wish**
1280 **they had told you more about the changes to your menstrual cycle before you started using the**
1281 **contraception method? [Participant raising her hand] Number 2.**

1282

1283 P2: It would have been better if they had told me that a month would end on [menstrual] periods. *Ay*
1284 [Meaning: A Zulu expression which in this context is an expression of being irritated], I wouldn't have
1285 started. [Menstrual] periods are annoying, I don't want to lie. But when you don't go on them
1286 [participant is referring to going on menstrual periods] you have that fear that my goodness, so long it
1287 is quiet. But I don't want to lie they [menstrual periods] are annoying, they are annoying.

1288

1289 **F: Okay//**

1290

1291 P2: //But if they had told me that my goodness a month even ends consecutively! I wouldn't have.

1292

1293 **F: So, you wouldn't have started to even use it//**

1294

1295 P2: //I wouldn't have started, the implant I wouldn't have started. The problem is I fear the injection. I
1296 have never been injected. That's why I chose the implant, because I fear the injection shame.

1297

1298 [Participant raising her hand]

1299

1300 **F: Okay, number 4.**

1301

1302 P4: If they had told me that there is a side effect that I would end up having, this lump cyst I don't
1303 know, I wouldn't have inserted the loop. I would have tried something else that is better. Maybe it
1304 would have shown a problem, but it was going to be better than the one I have now.

1305

1306 **F: Mhm [Neutral].**

1307

1308 P4: Yes.

1309

1310 **F: Okay.**

1311

1312 P6: Please may I say that according to my understanding, I believe that there is information that they
1313 hold back the time – let me talk about me – the time I inserted an implant, I think the nurse inserts this
1314 thing [implant] because she doesn't tell you everything. She just says no that it is an implant; it does 1,
1315 2 and 3. But then they don't mention abnormalities and everything. She just says, "no if it doesn't treat
1316 you well, come back to take it out if you have not completed 7 days and so forth. If it doesn't treat you
1317 well, come back to take it out". Then when you come back, okay sister, you said I must come back
1318 because now I am suffering, please can I take it out. Then they said, "no don't take it, stay with it and

1319 see how it will treat you. For now, since you have abnormal menstruation, here are tablets. Use these
1320 tablets to stop it. So, I feel like there is information that they didn't tell me, because if only I knew from
1321 the word go that this is what I will be facing maybe I would have opted for something else and not the
1322 implant.

1323

1324 **F: Okay. Which information would you have wished they shared with you?**

1325

1326 P6: I feel like everything! On a clean plate. Okay, since you are choosing an implant, here are the side
1327 effects that you will encounter. So, if you take this thing, just know you won't come back to the clinic
1328 to complain that 1, 2 is not happening, 3 and 4 is happening. So, know that the minute we insert this
1329 thing, you will face this. Not to come back after 2 weeks, I have inserted it, I have complications, I am
1330 complaining, I am having this and that. You see that? So, if only they would tell us that since we are
1331 choosing this thing, know that you face this. So, the only thing they say, they say, "we will insert you
1332 an implant, it will protect you, you see it does this and that". But they don't say the real problem,
1333 because what I have noticed is people who insert implants//

1334

1335 **F: //Mhm [Neutral]//**

1336

1337 P6: Yes, we have irregular menstruation but ours I feel like it is more, because if I speak with another
1338 person who has inserted an implant says, "you know I have also had this". Maybe we are talking, and
1339 we are at the clinic. "Since I inserted an implant, I have had this, I have been on my menstrual periods
1340 for this time". You see, we are having the same problem, but then it seems like there is nothing done
1341 about that problem that we are facing. It is like, "Okay! You have put yourself in it, sort it out yourself
1342 "!//

1343

1344 **F: //Mhm [Neutral]//**

1345

1346 P6: You will come here when you have a problem that you mention, because there are a lot of us. When
1347 you go to the clinic, you complain that "sister [Meaning: participant is referring to a nurse when she
1348 says sister] I went on menstrual periods for this long". Then she says, "ay [no] it is normal". Only to
1349 find out that the person who told you that it is normal has not inserted the implant. You are the one that
1350 has inserted the implant. So, you know the effects of all of this. Because we get there without any
1351 information. We tell ourselves that if I won't get pregnant, I must insert it [implant].

1352

1353 **F: Okay//**

1354

1355 P6: //I don't want to fall pregnant, so when they insert it, they say it is normal. You will be okay. I even
1356 ask that okay, if it is normal, why are you giving me these tablets to drink them because you are saying
1357 it is normal to go on [menstrual] periods for 6 months? But when I ask people around me that, "okay
1358 you have not inserted the implant, how does your menstrual cycle go?" then they say, "ay I go maybe
1359 that 2 weeks". Then when you tell a person that you go for 6 months, she will be, "there is a person who
1360 goes on menstrual periods for 6 months?"//

1361

1362 **F: //Mmh [Neutral]//**

1363

1364 P6: //You see something like that?//

1365

1366 **F: //Mhm [Neutral]//**

1367

1368 P6: So, I feel like there is information that they don't tell us.

1369

1370 **F: Okay.**

1371

1372 P6: Mhm [Participant is neutral].

CIMC 101 English 24 Dec 2024

Final Version 1.0

Page 26 of 41

1373
1374 **F: What is the most important information that you would like your friend to know about these**
1375 **changes before starting to use contraception? [Slight silence by participants] If you were to advise**
1376 **your friend.**

1377
1378 P6: I would advise her that an implant, ay [no] no if she knows that her health is weak to not insert it,
1379 because they don't [healthcare providers] don't remove it. Even if you tell them that you have a problem,
1380 the side effects are this and that they give you medication, but you are told that it is not removed because
1381 it is expensive. They say what they say. If you have money, you will even go to the doctor and remove
1382 it there straight. But at the clinic, they don't remove it. Their 3 months must be completed, their 3 years.
1383 Yeah, it is 3 years that need to be completed. You will suffer from those side effects if you don't have
1384 the strength to go to the clinic.

1385
1386 **F: So, would you tell her about the side effects?**

1387
1388 P6: Yes!

1389
1390 **F: Okay, is there someone else. [Participant's hand raised] Number 1.**

1391
1392 P1: I would tell her that it is difficult, like me. When you want to have a baby, you don't fall pregnant
1393 quickly, it becomes difficult. Some of us are forced to use injection so that they don't fall pregnant. So,
1394 when you want a baby, it becomes difficult to have it.

1395
1396 **F: Mmh [neutral] okay, is there someone else that would like to share? [Slight silence by**
1397 **participants] Okay, thank you so much. Uhm, we will move on to our next question. Are we still**
1398 **good?**

1399
1400 We are good [All participants responded together at once]

1401
1402 **F: Okay, so, there is an activity that we will do. We will talk about 2 questions. It is 2 questions**
1403 **that the healthcare providers and the researchers sometimes ask people about their menstrual**
1404 **cycle. So, please may we all stand up. [Movements of participants standing up] Okay, we can**
1405 **stand where we are standing. Okay, the first question says, "when you last had a period", let us**
1406 **think about when we had our last period, if you were to explain your last period, would you**
1407 **describe it as: light, moderate, or heavy? Those who say it was light, please raise your hands.**
1408 **[Participants raised their hands] Please can we go to this side and stand on my right. Those who**
1409 **say it was moderate, it was moderate, the last period. [Participants raised her hands] Please stand**
1410 **in the middle there. Those who say the last period was heavy, please raise your hands.**
1411 **[Participants raised her hands] Okay, please may they go this side, on the left. Alright, so, we have**
1412 **light, in our group of the light ones, they are 4 in total, it is number 7, 5, 3 and 2. And then**
1413 **moderate, we have number 1. Then with heavy, we have 6 and 4. Let's start with light. Anyone**
1414 **can respond, okay, so, how did you decide that your last period was light?**

1415
1416 P2: They were light. Okay, I spotted only.

1417
1418 **F: You spotted only?**

1419
1420 P2: Maybe 2 days and that was the end of it. 2 weeks back.

1421
1422 **F: Oh okay. So, the reason you said they were light is because you spotted.**

1423
1424 P2: I spotted only.

1425

1426 **F: Okay, let's go to the moderate. So, the decision to respond and say your last period was**
1427 **moderate, how did you decide?**

1428
1429 P1: It is something normal when I go on my periods.
1430

1431 **F: So, I would say it is medium. How do you measure that they are medium? What is different**
1432 **about them from before? How can you tell that they are medium?**

1433
1434 P1: I can tell by the fact that it is something the same as last month. So, there was no change that was
1435 there.

1436
1437 **F: Mhm [Neutral].**

1438
1439 P1: So, I can say it is medium.
1440

1441 **F: Okay, in our last group. How did we decide that they were heavy. What made us decide that**
1442 **they were heavy, our last period?**

1443
1444 P4: Mine were maroon or black. So, that is why I said they were heavy, and it was not for 4 days that I
1445 usually go on periods for. It was 8 days.

1446
1447 **F: Mhm [Neutral].**

1448
1449 P4: Yes, it was for 8 days. When I started, it was a spot that was not light. It was red and then it increased
1450 and had periods that are maroon or black.

1451
1452 **F: Oh okay. So, in other words, the days have increased //**

1453
1454 P4: //Yes.

1455
1456 **F: Oh okay. Thank you so much. Please may we raise our hands, I would like to ask when it was**
1457 **when you had your last periods. Okay, so, please may the ones that had periods last month or 2**
1458 **months ago to raise their hands [Participants raised their hands], number 6, number 7, number**
1459 **5 and number 1. Okay, the ones that had periods 3 to 6 months ago. [No hands were raised by**
1460 **participants]. Is there no one? [Slight silence by participants]. Okay, the ones who had periods**
1461 **more than 6 months ago. [Slight silence by participants, no hands were raised by the participants].**
1462 **So, when did the others have their last period. [Participants inaudible and speaking softly].**
1463 **Pardon?**

1464
1465 This month! [participants number 3 and 2 responded at the same time]

1466
1467 **F: This month.**

1468
1469 P2: This month, we spotted.

1470
1471 **F: Okay, number 3 and number 2 had their periods this month. Okay, number 4?**

1472
1473 P4: This month.

1474
1475 **F: This month.**

1476
1477 P4: Mhm [participant agreeing].
1478

1479 **F: Okay, alright, thank you so much. Is there anything that made it difficult to answer this**
1480 **question?**

1481

1482 No [All participants responded together at once]

1483

1484 **F: Okay, are we all still good?**

1485

1486 Yes. [All participants responded together at once]

1487

1488 P2: Yes, we are alright.

1489

1490 **F: Alright, so, we are going to move on to our next question that says, “on the heaviest day of your**
1491 **last period, how many menstrual pads, tampons, or other materials did you need to use? How**
1492 **many did you use when you were bleeding in your last period. [Participant raised her hand]**
1493 **Number 4.**

1494

1495 P4: I changed the [menstrual] pad maybe 4 times.

1496

1497 **F: Mhm [Neutral]//**

1498

1499 P4: //In the afternoon, 3 times later in the evening. That means I used 7.

1500

1501 **F: Okay, on that day?**

1502

1503 P4: Yes.

1504

1505 **F: Okay, and this is our heavy group. [Participant raised her hand] Okay, number 6.**

1506

1507 P6: As I have mentioned that since I had this problem, I was no longer using [menstrual] pads and
1508 tampons. I was using a cloth. So, when you are using a cloth, I think I say to myself that after 2 hours I
1509 want to change it because the cloth is quick to absorb [menstrual blood]. So, time and again, time and
1510 again you must change it.

1511

1512 **F: Okay, so, how many clothes did you use?**

1513

1514 P6: I would put together maybe 3.

1515

1516 **F: On that day when they were the heaviest, how many did you use?**

1517

1518 P3: I used 3.

1519

1520 **F: 3, okay. Okay, let's come this side, did you used [menstrual] pads, tampons, or which materials**
1521 **did you use and how many?**

1522

1523 P1: I used [menstrual] pads; it was just one pack.

1524

1525 **F: It was one pack.**

1526

1527 P1: Yes.

1528

1529 **F: How many are there in one pack?**

1530

1531 P1: There are 9 [menstrual pads].

1532

1533 **F: Okay, let's come this side, light.**
1534
1535 P2: I didn't finish them.
1536
1537 **F: You didn't finish them//**
1538
1539 P2: //I spotted for 2 days only. I didn't see the need to//
1540
1541 **F: Okay, on your heaviest day of your last period when you spotted, how many//**
1542
1543 P2: The last time I was on periods was in June, the heavy one. The last time was in June.
1544
1545 **F: Let's go back to your last period, when they were heavy. The day where they were heavy, even**
1546 **if you spotted. How many [menstrual] pads would you say you used?**
1547
1548 P2: I go on periods for the whole month, because I have inserted an implant.
1549
1550 **F: I hear you//**
1551
1552 P2: //It is not like before, I use them [menstrual pads], maybe 3 packs.
1553
1554 **F: Mhm [Neutral].**
1555
1556 P2: I use them, I change because there is a lot of blood.
1557
1558 **F: Okay, so, now we are talking about your last//**
1559
1560 P2: // I used only 2 pads, 1 for today and 1 for tomorrow only.
1561
1562 **F: Okay, on the 2 days that you have mentioned, which day would you say was the heaviest day**
1563 **that you were bleeding?**
1564
1565 P2: I was not bleeding a lot.
1566
1567 **F: You were bleeding a little?**
1568
1569 P2: I was spotting.
1570
1571 **F: You were spotting, okay, when you were spotting which day did you use [menstrual pads] more**
1572 **than the other?**
1573
1574 P2: There isn't.
1575
1576 **F: How many did you use?**
1577
1578 P2: 2.
1579
1580 **F: Okay, and others.**
1581
1582 P7: I second 2. I don't bleed a lot; I spot and most of the time I use pantyliners for 2 weeks. I use
1583 pantyliners, I spot. I don't bleed a lot.
1584
1585 **F: So, during your last period, which day did you use a lot of them?**
1586

1587 P7: I used 3 pantyliners.
1588
1589 **F: 3.**
1590
1591 P7: Yes.
1592
1593 **F: Okay. Number 5.**
1594
1595 P5: Yes, on my last period, I used 4 pads. It was 1 in the morning; in the afternoon it was 2 and then in
1596 evening it was 1.
1597
1598 **F: That was on the day it was heavy?**
1599
1600 P5: Yes.
1601
1602 **F: They were 4?**
1603
1604 P5: Yes, they were 4.
1605
1606 **F: Okay.**
1607
1608 P3: They were 2, one in the morning when I woke up and 1 in the evening.
1609
1610 **F: Okay, thank you so much. While we are standing, I noticed that there are differences in terms**
1611 **of your numbers. Let's start with our group that is light. Some said they used 3 pantyliners, others**
1612 **used pads, 2 or 4 and so forth. What do you think causes differences?**
1613
1614 P3: I would say that months are not the same//
1615
1616 **F: No, what caused the differences between your numbers, between you.**
1617
1618 P3: Oh, between us.
1619
1620 **F: Yes.**
1621
1622 [Slight silence, participant is still thinking. Another participant raised her hand]
1623
1624 **F: Yes, number 5.**
1625
1626 P5: Maybe our bodies are not the same.
1627
1628 **F: Your bodies are not the same.**
1629
1630 P5: Yes.
1631
1632 **F: Okay...**
1633
1634 P5: We have bloods that is not the same.
1635
1636 **F: Okay, is there something else that you would like to share? [Slight silence by participant] Okay,**
1637 **then we come this side, our heavy group. Uhm, your numbers are also not the same. An individual**
1638 **said 3, another individual was using 3 cloths and for another individual the numbers were more.**
1639 **Maybe what caused your numbers to not be the same? [Participant raised her hand] Yes, number**
1640 **4.**

1641
1642 P4: I think that we use materials that are not the same. Our contraception [methods] is not the same. So,
1643 hers and mine is not the same. Our periods won't be the same because we use different contraception.
1644
1645 **F: Mhm [Neutral], okay. Thank you so much. So, as we continue, I would like to know if there**
1646 **was anything that made it difficult to answer this question.**
1647
1648 **No [Participants responded together at once]**
1649
1650 **F: How do you think another person would have answered this question if she was using another**
1651 **material apart from [menstrual] pads or tampons, uhm, maybe let's say she was using menstrual**
1652 **cups or a toilet paper. How would she have answered the question that I asked you? [Participant**
1653 **raised her hand]. Number 4.**
1654
1655 P4: I think that someone using toilet paper maybe would have been shy.
1656
1657 **F: Mhm [Neutral].**
1658
1659 P4: Because the toilet paper is light. I used it when things were tough. So, I have used it before, I know
1660 that since I am bleeding heavy, it [blood] ends up spilling on to you. So, another person would have
1661 ended up being afraid and shy to say how much she was using. Maybe she is using 4 rolls [of toilet
1662 paper], since I am using 7 [menstrual] pads.
1663
1664 **F: Thank you so much. Thank you so much, how do you think another person would have**
1665 **responded to this question if they often don't have [menstrual] pads or tampons. Maybe let's say**
1666 **they really don't have it; how would they have responded? [Participant raised her hand]**
1667 **Number6.**
1668
1669 P6: I think it would have been hard to respond, because nowadays we don't help each other. Another
1670 person's need, to me it is my happiness//
1671
1672 P2: //Yes//
1673
1674 P6: //Not necessarily that I mean, me [chuckles by participant]//
1675
1676 **F: Mhm [Neutral].**
1677
1678 P6: But another person might rejoice in my problems. So, think that they wouldn't have been able to
1679 answer it because it was going to be like we are showing off and we will judge her and say, "why don't
1680 you go and ask for help", you see.
1681
1682 **F: Okay, okay, I hear you. So, sometimes people have a very small amount of bleeding, and they**
1683 **may not even need to use menstrual pad, tampon, pantyliner, or other material. What words**
1684 **would you use to describe this very small amount of bleeding. What do we call it?**
1685
1686 P7: I say *ngiyaspotter* [I am spotting].
1687
1688 **F: You are spotting. Is there another different word? [Slight silence by participant] Okay, what**
1689 **does the word to spot mean? How would you describe it?**
1690
1691 P7: If I were to describe it, I mean that the blood comes out a little, like it is spilling.
1692
1693 **F: Mhm [Neutral].**
1694

1695 P7: Mhm [participant is neutral], like dots, dots [referring to the portion of the blood].
1696
1697 **F: Oh okay, how do you know that you are spotting, or you are not on your [menstrual] periods.**
1698 **How do you distinguish it?**
1699
1700 P7: I distinguish it because I can see the blood, even if it is light but I can tell that I am spotting. And I
1701 feel [menstrual] cramps, which means I am on my [menstrual] periods. Because before I used the
1702 injection, I used to have [menstrual] cramps, I would feel [menstrual] cramps and could tell that I am
1703 spotting which means that even the periods.
1704
1705 **F: They are about to start [interviewer referring to menstrual periods].**
1706
1707 P7: Yes.
1708
1709 **F: Oh okay. How do you choose whether to use a [menstrual] pad, tampon, or other material if**
1710 **you are spotting?**
1711
1712 P7: I can tell with how it [menstrual blood] is coming, that how much it [menstrual blood] comes out.
1713 So, then I use a pantyliner. When it [menstrual blood] comes out a little bit, a little bit, I use a pantyliner.
1714
1715 **F: Oh okay. So, there is a question that I asked previously, that when you last had your**
1716 **[menstrual] period, which materials did you use? Do we remember it?**
1717
1718 Yes! [Participants agreeing]
1719
1720 **F: Okay, if you were spotting, how would you have answered that question?**
1721
1722 P2: I am not used to pantyliners.
1723
1724 **F: Okay...**
1725
1726 P2: I use a [menstrual] pad.
1727
1728 **F: How many would you use per day?**
1729
1730 P2: Spotting is something small, it is just drops [of menstrual blood]//
1731
1732 **F: //Mhm [Neutral]//**
1733
1734 P2: //Yes, I can use it maybe when I wake up in the morning, bath and wear it. In the evening if I can
1735 see that it [menstrual blood] is not there, I don't see a need [to change to another menstrual pad]. I will
1736 continue and wear the one from the morning.
1737
1738 **F: Okay, maybe 1 [menstrual] pad.**
1739
1740 P2: Yes, maybe also at night, or at night I can change it. It depends.
1741
1742 **F: Oh okay. Is there someone who would like to share something different. [Slight silence by**
1743 **participants] Or would use something different and not a [menstrual] pad. [Slight silence by**
1744 **participants] Thank you so much, we can sit down. Are we still good though?**
1745
1746 Yes! [All participants responded at once].
1747
1748 [Movements of participants sitting down]

1749
1750 **F: We can drink water if any of you would like to drink water. Okay, we are about to enter a**
1751 **topic that is a bit different from what we were talking about today. How would you like to be**
1752 **asked if you had sex or not? [Slight silence by participants] Which words would make it easier or**
1753 **more comfortable to answer when talking about sex, if you have done it not?**

1754
1755 [Slight silence by participants]

1756
1757 [Chuckles by participants, participants seem very shy]

1758
1759 **F: Mhm [Neutral].**

1760
1761 P6: I usually say, maybe when I am asking a person that I know, I say, **uwafreyile amachips** [Meaning:
1762 have you fried chips today]. So, the minute they say, “yes I fried them” I then know that oh, she was
1763 intimacy [Meaning: participant meant being intimate. She understood being intimate as having sexual
1764 intercourse]. So, it becomes easier to – or if the environment we are in, if there are children, so, if I say,
1765 “oh dear have you fried chips”, “yes I fried them dear”, “oh okay”.

1766
1767 **F: What do you mean when you say, “have you fried the chips”. How is it related to sex?**

1768
1769 P6: I think it is words that hide the person who is here//

1770
1771 **F: //Mhm [Neutral]//**

1772
1773 P6: //In front of us but not in our conversation. So, there are people that are sitting here but then listening
1774 to our conversation. So, the minute we say words and say words explicitly and she will be like, “yes”.
1775 We judge each other out here and stuff//

1776
1777 **F: //Mhm [Neutral]//**

1778
1779 P6: //So, another person will say, “my goodness how old is this person having sex”. So, the minute we
1780 use words that are not familiar, we know that we are both talking about the same thing. Rather than
1781 saying, “oh dear, did you have sex yesterday”.

1782
1783 [Chuckles by participants]

1784
1785 P6: You see. Then they will want to know [participant meant that the other person would want to know
1786 what they are talking about]. Because, what we do, a person wants to judge you. Maybe they look at
1787 your body and so forth. And say you are young, not knowing that you are an adult, but we are not built
1788 the same way.

1789
1790 **F: Okay, so, frying chips in having sex?**

1791
1792 P6: It is having sex, yes, being intimacy [Meaning: participant meant being intimate. She understood
1793 being intimate as having sexual intercourse] .

1794
1795 **F: Okay, is there another word that means having sexual intercourse? [Slight silence by**
1796 **participants] [Chuckles by participants]. If we were asked by a nurse or researcher, which words**
1797 **would make it easier or make you comfortable to answer if you have done sexual intercourse or**
1798 **not?**

1799
1800 P3: **Kade usenkonzweni yini** [Meaning: it is a question in isizulu translated directly as: were you at a
1801 church service]?

1802

1803 **[Chuckles by participants]**
1804
1805 P3: Were you at a church service yesterday?
1806
1807 **F: Mhm [Neutral].**
1808
1809 P3: Mhm [participant is neutral].
1810
1811 **F: Why do you call it church service?**
1812
1813 P3: [Chuckles] Ay! Please respond for me number 4.
1814
1815 **F: What does the word mean.**
1816
1817 P3: That you were at a church service?
1818
1819 **F: Mhm [Yes].**
1820
1821 P3: You see when growing up, they said that when talking about sexual intercourse, they said it is
1822 **inkonzo yasekamereni** [Meaning: It is a Zulu saying that translated directly as: a service for the
1823 bedroom] //
1824
1825 **F: //Oh...//**
1826
1827 P3://So, it stems from there.
1828
1829 **[Participant raised her hand]**
1830
1831 **F: Okay, number 4.**
1832
1833 P4: I wanted to second number 3; we usually say it is a service for the bedroom.
1834
1835 **F: Okay, what does the word sex mean to you?**
1836
1837 **[Chuckles by participants]**
1838
1839 P4: It means that you are going to make yourself happy with your significant other.
1840
1841 **F: In what way?**
1842
1843 P4: By sleeping and doing mischief.
1844
1845 **[Chuckles by participants]**
1846
1847 **F: What is mischief?**
1848
1849 P4: Mischief is when a man, oh a woman, a woman sleeps, there are different styles, maybe let's say
1850 uhm//
1851
1852 **[Chuckles by participants]**
1853
1854 P4: //The woman will sleep and face up like a chicken from **[name of store]**, the man opens your legs//
1855
1856 **[Chuckles by participants]**

1857
1858 P4: //Your legs, you woman. He will then insert//
1859
1860 P3: //Brinjal [Meaning: it is a vegetable also known as an eggplant, participant suggested it because it
1861 is shaped like a penis. Therefore, according to the participant another word for a penis is brinjal]
1862 [participant was whispering to another participant]//
1863
1864 P4: //Mhm [no], he will insert his cigarette//
1865
1866 **F: What is cigarette?**
1867
1868 P4: It is a penis!
1869
1870 P3: Oh, my goodness!
1871
1872 [Chuckles by participants]
1873
1874 **F: Oh okay, mhm [Neutral].**
1875
1876 P4: That's it.
1877
1878 **F: Thank you so much. Let's relax.**
1879
1880 [Chuckles by participants]
1881
1882 **F: Let's relax because we all have experienced the topic that we are talking about [Chuckles by**
1883 **interviewer]. Let's just relax. Yes, I saw number 2 had raised her hand. What does the word sex**
1884 **mean to you?**
1885
1886 P2: I didn't raise my hand, my goodness! [Chuckles by participant]
1887
1888 **F: Is there anyone else who would like to share? [Chuckles] [Slight silence by participants,**
1889 **participants are uncomfortable and shy] Okay, what do the words sexual intercourse mean to you**
1890 **or vaginal intercourse? [Slight silence by participants]**
1891
1892 P2: Please repeat the question.
1893
1894 **F: The word sexual intercourse, what does it mean to you? [Participant raised her hand] Yes,**
1895 **number 5.**
1896
1897 P2: When I think of vaginal intercourse, I think of masturbating. I would say they must make it clear
1898 that you have sex with your opposite gender. It is like you are satisfying yourself [participant is referring
1899 to vaginal intercourse].
1900
1901 **F: Mhm [Neutral], that is how that word sounds?**
1902
1903 P2: Yes, it sounds like that.
1904
1905 **F: Oh okay. Maybe let me say this in English, what does the word vaginal intercourse mean to**
1906 **you? [Slight silence, participants thinking] Or what does it mean, if you were to explain vaginal**
1907 **intercourse or sexual intercourse. [Participant raised her hand] Mhm [Neutral], number 4.**
1908
1909 P4: It is to partake in sex.
1910

1911 **F: Okay...**
1912
1913 P4: Yes, with yourself.
1914
1915 **F: Mmh [pardon]**
1916
1917 P4: With yourself.
1918
1919 **[Chuckles by participant]**
1920
1921 P4: With no second person.
1922
1923 **F: The word sexual intercourse or vaginal intercourse means that to you.**
1924
1925 P4: Sexual intercourse...[participant thinking] Mhm [Yes].
1926
1927 **F: It is when you are having sex alone.**
1928
1929 **[Chuckles by participants]**
1930
1931 P6: Please may I try.
1932
1933 **F: Yes, number 6.**
1934
1935 P6: I think it is fun between two people. A man and woman. So, the minute they become sexual
1936 intercourse, that is when they do intimacy [Meaning: participant meant being intimate. She understood
1937 being intimate as having sexual intercourse].
1938
1939 **F: Mhm [Neutral].**
1940
1941 P6: They are genders that are not the same.
1942
1943 **F: Oh, it is genders that are not the same, that do intimacy [Meaning: participant meant being**
1944 **intimate. She understood being intimate as having sexual intercourse].**
1945
1946 P6: Yeah.
1947
1948 **F: What is intimacy?**
1949
1950 P6: It is sex.
1951
1952 **F: It is sex.**
1953
1954 P6: Mhm [Participant agreeing].
1955
1956 **F: Okay, alright, is there anyone else that would like to share? [Slight silence by participants]**
1957 **Okay, healthcare providers sometimes at the clinic or researchers sometimes ask whether you**
1958 **used a second method of contraception when you last had sex. How do you think this question can**
1959 **be better phrased? What words would make it easier to understand this question or answer?**
1960 **[Participant raised her hand] Number 4.**
1961
1962 P4: **Ugcine nini ukuya kamfana** [When last did you go to the boy's house]
1963
1964 **F: Ugcine nini ukuya kamfana** [When last did you go to the boy's house]

1965
1966 P4: Mhm [Yes].
1967
1968 **F: Okay...**
1969
1970 P4: Or **umgcine nini umfana** [when last were you with the boy]?
1971
1972 **F: Okay...Okay, so, here they want to find out if there is a second method that you used for**
1973 **contraception so that you don't fall pregnant, when you last had sex.**
1974
1975 Mhm [Participants neutral]
1976
1977 **F: How do you think it is best to ask this question?**
1978
1979 P7: I think that they must ask if you and the person that you slept with used a condom.
1980
1981 **F: Oh, you used a condom.**
1982
1983 P7: Yes, a condom. They can phrase it that way.
1984
1985 **F: Okay, what do others say? [Slight silence by participants] Okay, when we are talking about a**
1986 **second method of contraception, what do you think of? [Participant raised her hand]**
1987
1988 P4: It is a female condom and the one that is inserted by men.
1989
1990 **F: Oh, those are methods of contraception, okay. What else? [Slight silence, participants are**
1991 **exhausted] Is there anything else that we use to prevent pregnancy? [Participant raised her hand]**
1992 **Yes, number 1.**
1993
1994 P1: Oh, I thought you were saying another thing that you protect yourself from, apart from pregnancy.
1995
1996 **F: No, it is methods of contraception when talking about preventing pregnancy.**
1997
1998 [Slight silence, participant is thinking]
1999
2000 P1: There isn't.
2001
2002 **F: Okay, you may share what you wanted to share.**
2003
2004 P1: I wanted to say, maybe other methods of contraception for you to know get HIV infected maybe
2005 take PrEP.
2006
2007 **F: Take PrEP...**
2008
2009 P1: Mhm [Neutral], yes.
2010
2011 **F: Oh okay... Alright, thank you so much. When we are talking about the second method of**
2012 **contraception to prevent pregnancy, would you consider including withdrawal as a second**
2013 **method to prevent pregnancy?**
2014
2015 [Slight silence by participants]
2016
2017 **F: Do we know of withdrawal?**
2018

2019 P3: Is it to “pull out” or what?
2020
2021 **F: Pardon.**
2022
2023 P3: Is it “pull out” or? What is withdrawal?
2024
2025 **F: What is pull out?**
2026
2027 [Chuckles by participants]
2028
2029 P3: It is when someone comes out.
2030
2031 **F: What is it?**
2032
2033 P3: It is when a person pulls out when they feel that they are about to//
2034
2035 P2: //Ejaculate//
2036
2037 P3: //Ejaculate.
2038
2039 **F: Oh okay, what is he pulling out?**
2040
2041 P3: His penis, he takes it out of her vagina. He pulls it out and ejaculates outside [of the vagina].
2042
2043 **F: When having sexual intercourse.**
2044
2045 P3: Mhm [Yes].
2046
2047 **F: Oh okay. Do you think that can be a second method to prevent pregnancy?**
2048
2049 P3: *Eish* [this is an expression isiZulu that shows that the individual is not at ease or disagrees about a
2050 certain thing], but it is not 100% , *ay* [no] no. [Participant is speaking softly, inaudible]
2051
2052 **F: Mmh [pardon].**
2053
2054 P3: All these things are not 100% but that one *eish* [this is an expression isiZulu that shows that the
2055 individual is not at ease or disagrees about a certain thing] no.
2056
2057 **F: You don’t agree//**
2058
2059 P3: //It is risky.
2060
2061 **F: Why?**
2062
2063 P3: Let’s say that a small portion is left behind [sperms] and he insert it [penis] in [the vagina], even if
2064 he pulls out it is late by then. That is what they say. It is risky.
2065
2066 **F: Okay, what do others say? Would you use it as a method to prevent pregnancy?**
2067
2068 P6: May I say something?
2069
2070 **F: Mhm [Yes].**
2071

2072 P6: What is sometimes suggested by nurses is to abstain. But nowadays we don't do that, because I
2073 mean like everyone is doing it. So, you will ask yourself, "why must I abstain worse others you see//
2074

2075 **F: //Mhm [Neutral]//**
2076

2077 P6: //They are intimacy [Meaning: participant meant being intimate. She understood being intimate as
2078 having sexual intercourse]//
2079

2080 **F: //Mhm [Neutral]//**
2081

2082 P6: // So, that is the only method that they sometimes use of which it is not working for people.
2083

2084 **F: Oh okay. So, you would say to abstain maybe will help, instead of person to pull out.**
2085

2086 P6: Yes, according to my understanding. If you have not started [having sex], don't start.
2087

2088 **F: Okay.**
2089

2090 P6: Just abstain [Chuckles].
2091

2092 [Chuckles by participants]
2093

2094 **F: Okay, are there any of you that think of not to start, and have days where they don't have sex?**
2095

2096 P4: Number 4.
2097

2098 **F: To prevent pregnancy, yes.**
2099

2100 P4: From my perspective, it [sex] is done because it is part of life in this world.
2101

2102 [Chuckles by participants]
2103

2104 P4: From my perspective, it [sex] should be discontinued. I stay for 3 months without any issues, maybe
2105 we will argue over this cup, I then say no with my vagina, he must stay at his house, and I must stay at
2106 home.
2107

2108 [Chuckles by participants]
2109

2110 P4: The vagina is mine, if I don't want with it, I don't want with it. And it happens naturally to me that
2111 I should annoy him with something small and then he will whistle at me. Then I say, "no one whistles
2112 at me, lobola [it is a traditional African custom where the groom's family pays the bride's family before
2113 the wedding] was paid for me, go and whistle at your harlots. A person must call or knock and come
2114 in". Then from there I don't want to give him my vagina for 2 months, 3 months [the participants means
2115 that sometimes she does not have sexual intercourse with her male partner for 2 to 2 months].
2116

2117 **F: What makes you sometimes not want to have sexual intercourse?**
2118

2119 P4: I also don't know. But it just happens.
2120

2121 **F: It just happens.**
2122

2123 P4: It just happens.
2124

2125 [Participant raised her hand]

F: Okay, number 6.

P6: Just to add to number 4. I also have that problem, but I think it is because of the implant I inserted. As I have mentioned before, it made me lose interest in sex. So, it happens that – because at the end you must do it [sex] but at the back of mind, I tell myself that I am pushing [participant encourages her partner during sex] him, because I don't want to [have sex].

F: Mhm [Neutral].

P6: But now I can't say pull out and leave. I can't, I must submit to those rules [participant referring to rules that her partner might come up with during sex]. Because okay fine, he will understand for that time that now I am on my [menstrual] periods. Maybe for that 3 months, 4 months, 6 months, he will wait for me. But on his mind, he is doing me to wait for me. Because I make him understand that right now since I am in this period like this [participant referring to menstrual periods], so, since I go on menstrual periods heavily there is a possibility that you will get sick somewhere somehow because what is coming out of me [participant referring to the menstrual blood] is dirty. We mustn't touch each other.

F: Okay, thank you so much for the experiences that you have shared today. Before we end our discussion, I would like to know if there is anything that you would like to share about your menstrual cycle while using contraception that we didn't discuss today? [Slight silence by participants] Is there anything that we left out?

No [All participants responded at once].

F: Okay, thank you for joining our discussion today. We are very grateful that we had an opportunity to share our thoughts, your information is very important. The time now is 12:31, the date is 27 November 2024, focus group C102.

[End of transcript]
